

Open new possibilities for your research in image analysis.

Take the opportunity to apply your expertise to industry's challenges.

AIMday[®] Image is a meeting focused on making contacts between academic researchers and companies. The meeting brings new perspectives to companies' challenges by matching these with your academic expertise.

What AIMday Image offers:

- Meet company representatives who present real problems.
- Learn about industry's needs for new knowledge and competence in your area of expertise.
- Discuss collaborations in various forms (e.g. joint programs, commissioned research, and PhD-programs).
- Make contacts within the industry that might lead to future projects or employment.
- Meet other scientists across universities and departmental borders to discuss issues of common interest.

AIMday Image will be held in conjunction with SSBA 2013 on March 13 in Gothenburg.

Sign up for questions of interest to you!

AIMday Image focuses upon companies' challenges and needs for new knowledge. The meeting is centered around workshops where questions raised by the companies are discussed together with academic scientists and experts from several different disciplines and universities. At AIMday Image 2012 we received questions from Astra Zeneca, GE Healthcare, Combitech, Savantic, SKL and Innventia, among others.
